## LTC Ledger

### Why are Student Council Activities important?

#### Vice-President

**Teresa Campbell**

Student council activities develop character. They help build each individual, who participates in them, into the type of leaders needed for success. Student council events and similar activities engage students and unify the schools. They are capable of making a huge and lasting impact which any school may need.

#### President

**Rachel Yee**

It is essential to stay involved with student activities within your own school. The best way to lead is by example. Passion and enthusiasm are contagious. You peers will notice your dedication and attendance. Getting involved in student activities is the best stepping stone to increasing school spirit and morale. Overall, if the student body is involved and takes ownership and pride in their school, everyone's school experience will improve.

#### Secretary

**Erica Rubin**

I am a part of Student Council, because I believe all the work we put into different events and charities truly makes a positive impact on the community and even the world. Student Council provides many opportunities to make a difference and that is why I am so passionate. Student council is and will probably remain a very important part in my life.

## **Jake Davies—Publications**

Student council provides endless opportunities to help your school and serve your community. Student council is more than just an activity it helps your schools spirit and gets so many students involved. Also, it provides a way to give back to your community through many different service projects. Overall, student council helps enhance your leadership skills and become a better person.

## **Kenny Patrone—State BOE. Rep.**

It is important to get involved. Being part of an activity helps to give you an identity. It gives you a reason to come to school, meet new people, and develop new friendships. Being involved, can open endless opportunities for your life.

## **Griffin Muli—Special Projects**

Student Council is the back bone of a successful school. It encourages student involvement and leadership. Student council is important, because it is a great channel for ideas and if used properly can be a huge asset in any high school.

## **Patrick Bryson—State Charity**

Student Council activities teach students about the community and give them responsibilities which help them grow as leaders. These activities are important, because they are selfless acts that build character and quality traits. Student council members, through their activities, can make a big difference. This shows students that they are an important part of their communities and need to be involved.

## Franshesca Castoria- Treasurer

I believe student council activities are important, because without any activities there will not be any way to raise school spirit and involvement within a school. Activities can attract many students to work together for a cause, reason, or even for fun. Student council activities bond members of the school and the community together to become one.

## Parnika Puri— Middle level Rep.

Activities like student council are important, because it is a student's way of giving back to his/her school. Students have a voice in their council which gives them the opportunity to act on changes they would like to see around them. Student council is a way for students to get involved as a positive influence on their peers. Without activities, students have no idea what they can do for their communities. It is a very important part of a school and students lives.

## Northern AA—Colby Thomas, Jeff Hunt, Jackie Rozell

Student Council and other after school activities are a fun and important aspect in our schools. They can boost the self esteem and morale of a person or even an entire school or community. They encourage students to participate in school affairs who otherwise may have never even considered doing something like that. Just step back and consider all the great places, our love for leadership has taken us.
